

Readings for Summer 2023

This semester we are reading Frantz Fanon's *The Wretched of the Earth* (Grove Press, 2004). We will read the whole book. That is roughly 239 pages, not including the endnotes. We will do this reading over 13 weeks (the first of the 14 weeks of the course is for a general introductory discussion). So, we will try to average roughly 18 pages per week, which is roughly 2.5 pages of reading a day, though some weeks will be a little more than that, some a little less.
